

Chemotherapy can be high-risk care.

Learn the latest techniques to protect yourself and your patients.

Multi-professional Oncology Safety Simulation and Training (MOSST) is an educational program focused on safe chemotherapy administration. MOSST combines an in-person workshop with supplemental online resources to improve knowledge and skills, promote clinician behavior change, and highlight benefits to healthcare organizations and patients.

- Targeted for nurses and pharmacists
- Nurse-pharmacists teams from the same site encouraged to apply
- Taught by leading experts in chemotherapy safety
- The workshop will consist of a combination of lectures, case studies, and simulation techniques.
- Free of charge
- \$300 gift card provided to participants

Topic areas

- Chemotherapy safety principles
- Managing patients receiving oral anti-cancer therapy
- Managing oncology emergencies
- Hazardous drug handling and spill response
- Extravasations

Apply by June 1, 2018 for the October 20, 2018 workshop at mosst.nursing.umich.edu

Workshop is held at the University of Michigan School of Nursing in Ann Arbor, Michigan.

This training program is supported by the National Cancer Institute of the National Institutes of Health under Award Number R25-CA214227.

We strongly encourage women, minorities, individuals with disabilities and veterans to apply to our training program. All qualified applicants will receive consideration for enrollment without regard to race, color, religion, gender, sexual orientation, sex, national origin, age, disability status, protected veteran status, or any other characteristic protected by law.
