

# MYRIGHTDOSE

## Dose Exchange Program

With MyRightDose, your patient can continue her Verzenio® therapy at the appropriate dose for her, without the hassle of delays and at no cost to her.

The MyRightDose program is designed to assist you when you have decided to reduce a patient's dose, before she has finished her current blister packs of Verzenio for that cycle. With MyRightDose, eligible patients can receive the appropriate dose to finish that month's cycle in as early as 48 hours after receipt of the enrollment form.

### ELIGIBILITY REQUIREMENTS

To be eligible for the MyRightDose program, a patient must:

- Be prescribed Verzenio for an FDA-approved indication
- Be 18 years of age or older
- Return her unused pills in the provided pre-addressed envelope and according to the instructions provided by MyRightDose after she has received her new dose
- Be a resident of the United States or Puerto Rico

**Please note:** To provide her dose at no charge, this program is dispensed by Sonexus rather than your in-office dispensary or the specialty pharmacy that is currently dispensing your patient's prescription. Verzenio can be shipped to the patient as early as 48 hours after the receipt of the enrollment form. We will contact your office as soon as she's received her new dose so you can begin the process of starting her next month's script.

### Terms and Conditions

- The MyRightDose program is available at no charge to any given patient prescribed Verzenio for an FDA-approved indication for up to three separate dose reductions in a 12-month period. The quantity to be exchanged should be between 5 and 28 days per exchange
- Neither the prescriber, prescriber's institution, pharmacy, pharmacist, or any other person, including the patient, may seek payment or accept reimbursement from any patient, any third-party payer, including any state or federal entity or any private or other insurance plan, or from any other person or entity, for Verzenio supplied under this program, regardless of whether the payer subsequently determines it will cover the product
- Product provided pursuant to this program may not be sold, traded, or distributed for sale
- Prescriber must notify patient of requirement to return prescription, as well as assent to the medical appropriateness of the therapy
- Additional Terms and Conditions apply. See enrollment form for details

# MYRIGHTDOSE

## Step-by-Step Guide to MyRightDose

A completed MyRightDose enrollment form is required for your patient to participate in the MyRightDose program. This form can be downloaded from [verzenio.com/HCP](http://verzenio.com/HCP) under Savings and Support.

You complete the MyRightDose enrollment form for your patient and then fax it to 1-833-665-6329. Prescription fulfillment and delivery are made by Sonexus Health Pharmacy Services (SHPS) rather than the specialty pharmacy you usually work with.

- In order for her new dose to be provided at no cost to her, SHPS will coordinate this program
- She will return to her regular specialty pharmacy for the next month's cycle, so it is important to ensure that the details of her prescription are correct

### How MyRightDose works

STEP 1

**Fax enrollment form to 1-833-665-6329**

An SHPS intake coordinator creates an account for your patient based on the information you provided on the enrollment form.

STEP 2

**SHPS contacts the patient**

An SHPS intake coordinator contacts your patient to confirm delivery details and schedule delivery.

- Two attempts by phone will be made to reach your patient
- If contact is not made within two attempts, you will be notified in order to help determine how to proceed
- If the patient has any questions, she will be transferred to a trained pharmacist

STEP 3

**Secure the product**

The specified number of days of Verzenio in the new dosage is then shipped directly to your patient in as early as 48 hours.

STEP 4

**SHPS confirms receipt**

A pharmacy technician contacts you and your patient to confirm delivery of the product and reinforce the need to ship back the unused portion of the original prescription.

STEP 5

**Patient ships unused tablets to SHPS**

The pharmacy will properly dispose of the unused portion of the original prescription.
