

NOW ON FORMULARY: FRUZAQLA® (fruquintinib) is Covered on CVS Caremark National Template Formularies

As of 7/1/25, FRUZAQLA® (fruquintinib) is covered on CVS Caremark National Template Formularies. This means that most commercial patients will have more rapid access to FRUZAQLA and a lower co-pay.

With this formulary update, 93% of commercial lives are now covered for FRUZAQLA.

Takeda hopes that this formulary update helps improve patient access and time to treatment start for FRUZAQLA.

Please note, FRUZAQLA's limited distribution network remains unchanged and excludes PBM-owned specialty pharmacies. FRUZAQLA can be ordered from Biologics and Onco360 specialty pharmacies or purchased from the following specialty distributors to be dispensed through accounts that have a medically integrated pharmacy: ASD Healthcare, Cardinal Health Specialty Distribution, McKesson Plasma & Biologics, McKesson Specialty Care Distribution, and Oncology Supply.
